

# John Javier Idmilao

FULLSTACK SOFTWARE DEVELOPER / PHP · LARAVEL · VUE · REACT

Isabela, Cagayan Valley, Philippines • 0975 014 8734 • johnjavieridmilao12@gmail.com  
linkedin.com/in/john-javieridmilao-92b881206 • johnjavier.epizy.com/MyPortfolio

Backend-leaning fullstack developer with 7+ years building web applications across PHP/Laravel, CodeIgniter, Vue.js and React. Specialised in payment-gateway and billing systems — integrating Maya (PayMaya) and Dragonpay with reliable callback, webhook and confirmation handling — alongside relational database design, RESTful APIs, secure auth/RBAC and Dockerised deployment.

## EXPERIENCE

### Camaya Coast

Jun 2023 – Present

Software Engineer II

Bataan, PH

- Develop, maintain and enhance full-stack web applications using Laravel, React, Vue.js and MySQL.
- Integrate Maya (PayMaya) and Dragonpay payment gateways — processing, callbacks and webhooks — plus ITEXTMO/Semaphore SMS for OTP and notifications.
- Design and optimise relational databases (schema, migrations, queries) and build RESTful APIs with secure auth and role-based access control.
- Containerise applications with Docker and deploy on DigitalOcean; collaborate across teams via Git.

### Biopharma Medical Solutions

Aug – Oct 2025

Web Developer

Remote / cPanel

- Full-stack development with Laravel, Inertia.js, React and MySQL; deployment and maintenance via cPanel.
- API development, database design and performance optimisation, working with designers and stakeholders.

### Dygen Food Ventures Inc.

Jan – Mar 2025

Web Developer

Remote / cPanel

- Full-stack development with Laravel, Inertia.js, React and MySQL — API development, schema design and performance optimisation.

### Ropali Corporation

Apr 2021 – Jun 2023

IT Programmer I · 2× Malasakit Award

Isabela, PH

- Built front-ends with Vue.js/jQuery on CodeIgniter and Laravel back-ends; designed RESTful APIs across multiple applications.
- Managed MySQL and MSSQL databases, integrated Acumatica ERP, and maintained Production and UAT environments.
- Performed legacy code refactoring to improve performance, readability and maintainability.

### R.P. Alingog Development Corporation

Oct 2019 – Apr 2021

IT Programmer / Analyst

Isabela, PH

- Front- and back-end development with PHP, jQuery, MSSQL and MySQL; production deployments, system maintenance and bug fixing.

## TECHNICAL SKILLS

|                   |                                                                           |
|-------------------|---------------------------------------------------------------------------|
| Backend           | PHP, Laravel, CodeIgniter 4, Inertia.js, RESTful APIs                     |
| Frontend          | Vue.js, React, JavaScript, jQuery, Flutter                                |
| Databases         | MySQL, MSSQL — schema design, migrations, query optimisation              |
| Integrations      | Maya (PayMaya), Dragonpay, ITEXTMO, Semaphore, Acumatica ERP              |
| Platform / DevOps | Docker, DigitalOcean, Git, cPanel                                         |
| Practices         | Auth & RBAC, legacy refactoring, UI/UX-to-code, cross-functional teamwork |

## EDUCATION

### Isabela State University

Bachelor of Science in Information Technology
